DEATH OF MR. A. E. M'GREGOR,-We have the

implement duty of recording the death of Mr.

M'Gregor, which occurred at the hospital, on Sunday

morning, from disease of the heart. Mr. M'Gregor

arrived in the Fijis from Honolulu, where for many

years he had been engaged in sugar planting, and

his experience in this particular branch of industry

was probably second to none in the colonies. The

warm and genial climate of Fiji, accorded for a time

relief to the invalid, and in following his favorite

study of the sugar cane he became a most useful and opportune instructor to many of our planters. Through the columns of the Press he gave expres-

sion and publicity to the experience he had obtained

by years of application. He was ever ready to im-

part his knowledge to anyone, and he did so in a

manner so explanatory that it was almost impossible

not to acquiret a thorough idea of sugar culture.

After some months in the group, a return of his old

complaint caused him to again seek medical advice,

and, acting upon the opinions of his friends, he took

a trip to New Zealand with his old and particular

riend Captain Berrill of the Dauntless; here his

bealth, to all appearances, improved, for he returned

scription for a weekly concert by the hand, in addi-

The Firemen's election on Monday evening, for chief and assistants, resulted in the re-election of Chief Engineer J. S. Lemon, First Asst Lucas, and Second Asst. Nott, by a unanimous vote, which indicates that they are very popular officers.

A MUSICAL CELEBRITY.-We understand that Madame Ristori, accompanied with a troupe of thirtytwo musicians and vocalists, had engaged passage in the City of Melbourne, to leave San Francisco June 21 for Sydney. The vessel will remain here the fine himself. over one night only to allow of one performance. She will be due here Tuesday the 29th inst.

A PROSPEROUS COMPANY .- The annual report of the "North British and Mercantile Insurance Company" has been laid on our table by the Agents, Messrs. Ed. Hoffschlagger & Co., from which we learn that the assets of the company amounted December 31, to £2,827,238, equal to \$14,000,000-a sum which ought to be considered as a perfect security by those who insure in this company. Am bark Powhattan, sailed from Poget Sound about June

FINE FRUIT .- In the show window of our bookstore, may be seen a plate of targe mangoes from a Haw, schr Uilama, English, from the Guano Islands, about tree planted and raised by the publisher of this paper, and which show what may be done in the way of improving our fruits, by care in selecting seeds Some of the mangoes exhibited measure between 12 and IS inches in circumference, and weigh about a pound apiece, while almost every fruit that the tree has borne last year and this has exceeded ten inches

> Roses By Mail. - We received last week a circu-Inr from a leading American firm of Florists, Mesers. Teas & Co., of the Cascade Nursery Company, Richmond, Indiana, who make a specialty of raising roses and supplying orders for the same by mail With a view to test this method, they sent us by mail a small parcel, containing ten rose slips, which though they were 34 days on route, reached Ho notalu in fine condition, and will probably ali grow These slips we have distributed without charge among our amateur florists, who will probably have occasion to order new varieties. The above firm issues annually a catalogue of over 700 kinds of roses, a copy of which, mailed to us, has not yet been received. The postage on the parcel of roser sent to us, for distribution was 62 cents, and in it were ten different varieties. We refer those who wish to obtain roses, to the card of Messrs, Teas & Co., and doubt not they can fill any orders in their line. There can be no better or more expeditions way to obtain choice roses than by mail. A five dollar greenback will pay for a dozen or fifteen plants and the American postage on them. Directions should be sent to unil them ten or twelve days before the date the steamer is advertised to leave San Francisco, for which information, a GAZETTE time table should be sent with the order.

AMERICAN RELIEF FUND.-We have received from the officers of this Society a circular detailing the work done through its agency since the date of its organization. It appears that the receipts have been about \$9,000, all of which sum has been spent in relieving destitute Americans. The object of the circular is to enlist more general interest in the Society which needs the aid of every American living in the Islands; which we trust it will receive. It says: "It was moved and unanimously carried, that the President be requested to draw up a full statement of the operations of the Association from its origin, and that the same be published in a Circular, and sent to every sdult American residing on the Hawaiian Islands, accompanied by an appeal for funds. By examining this Report, it appears that not one half of the Americans residing on the Islands are now subscribers, neither ever have been. Some may claim exemption on account of inability, but with scores no such excuse could be offered. The tax is only \$12.00 per annum, or \$1.00 per month, and surely there are but few Americans residents who are not able to contribute this annual amount for the benefit of their less fortnesse countryn Americans owning property should remember that the Hawaiian Government levies no fax upon said property for the support of paupers, as is the case in all other civilized countries. There are many Americans-non-subscribers to this Relief Fundwho would be compelled to pay a large amount in the shape of a "Poor Rate Tax," If the Pauper Law was in force. Under all the circumstances it is perhaps well that no such law exists, then most surely haps well that no such law exists, then most surely property-holders and others ought not to excuse themselves from liberally subscribing for the aid of their countrymen less formate than themselves. It will appear that the majority of the subscribors reside in Honodula, and upon them devolves the responsibility of providing for indigent Americans, who have resided at remote parts of the group, but when misfortane or sickness has overtaken them, come to Honodula and appeal for sid. To equalize the burden, Americans residing on Mauj, Hawaii and Kanai, should subscribe to the Relief Fund as well as residents of Honolula."

THE ART OF SPELLING .- A correspondent of the Boston Advertiser submits the following statement to those who believe, with Francis Galton, that human secomplishments are to a great extent hereditary : In Philadelphia, in a spelling-match held at the

Academy of Music, two sisters took the two prizes. In Roxbury, two brothers took the prizes at a spell-In Northborough Mass., a mother and her son took

In Haverhill, at a spelling contest, a brother and sister were the last two to compete for the prize. The contest of these two quite amused the audience, till it finally ended over calinh, or calif. The authority required the rendering to be caliph, and Harvard won, though a subsequent search of authorities showed both forms of spelling to be current. The victor gracefully transferred the prize, a silver cake-basket, to his sis-

It must be remembered, in giving weight to these four examples, that two of a family do not always, perhaps do not often, compete at the same time.

At Gloucester, England, recently, a man was fined by a magistrate for stealing a ride on the railroad, and as the man was very poor, the magistrate paid

On good authority it is reported that the Queen of Madagascar has issued a proclamation ordering the liberation of all slaves imported into that country since 1865, in which year a treaty was entered into with Great Britain for the suppression of the traffic in human flesh. The released slaves, in accordance with the terms of this proclamation, may either remain in Madagascar or return to their own country.

A log of wood containing a scaled bottle has just been picked up at Havre. The writing it contained was perfectly clear, although it began its voyage in 1860. It was one of the bottles thrown overboard from the Prince Napoleon in its Arctic expedition t test the force of currents. The last was picked up about fifteen years ago.
